

DOES THE GRID PROVIDE YOU WITH THE BEST ELECTRICITY?

IMPROVE THE POWER QUALITY AND
SAVE 5-15% ON YOUR ENERGY USAGE (kWh)

with NO voltage optimisation

- ✓ VOLTAGE FLUCTUATIONS
- ✓ OVERVOLTAGE FOR DESIGN
- ✓ HARMONICS

with PATENTED voltage optimisation

- ✓ STABILIZED
- ✓ OPTIMAL VOLTAGE
- ✓ REDUCED HARMONICS
- ✓ PHASE BALANCING

with traditional transformer

- ✓ ONLY VOLTAGE REDUCTION
- ✓ POSSIBLE UNDERVOLTAGE
- ✓ HARMONICS
- ✓ POOR POWER QUALITY

WE MAKE YOUR BUILDING MORE ENERGY EFFICIENT

VOLTAGE OPTIMISATION

Dear Engineer,

What we do is use overvoltages and fluctuations to enhance the actual power supplied.
We do this by pushing the excessive voltage antiphase (180°).
